

Design Governance

How to Run Design Practices

Service Design Network New York Chapter
September 2020

Workplace strategy and design studio, shaping the container in which innovative work happens.

Who we are

Antonio Cesare Iadarola

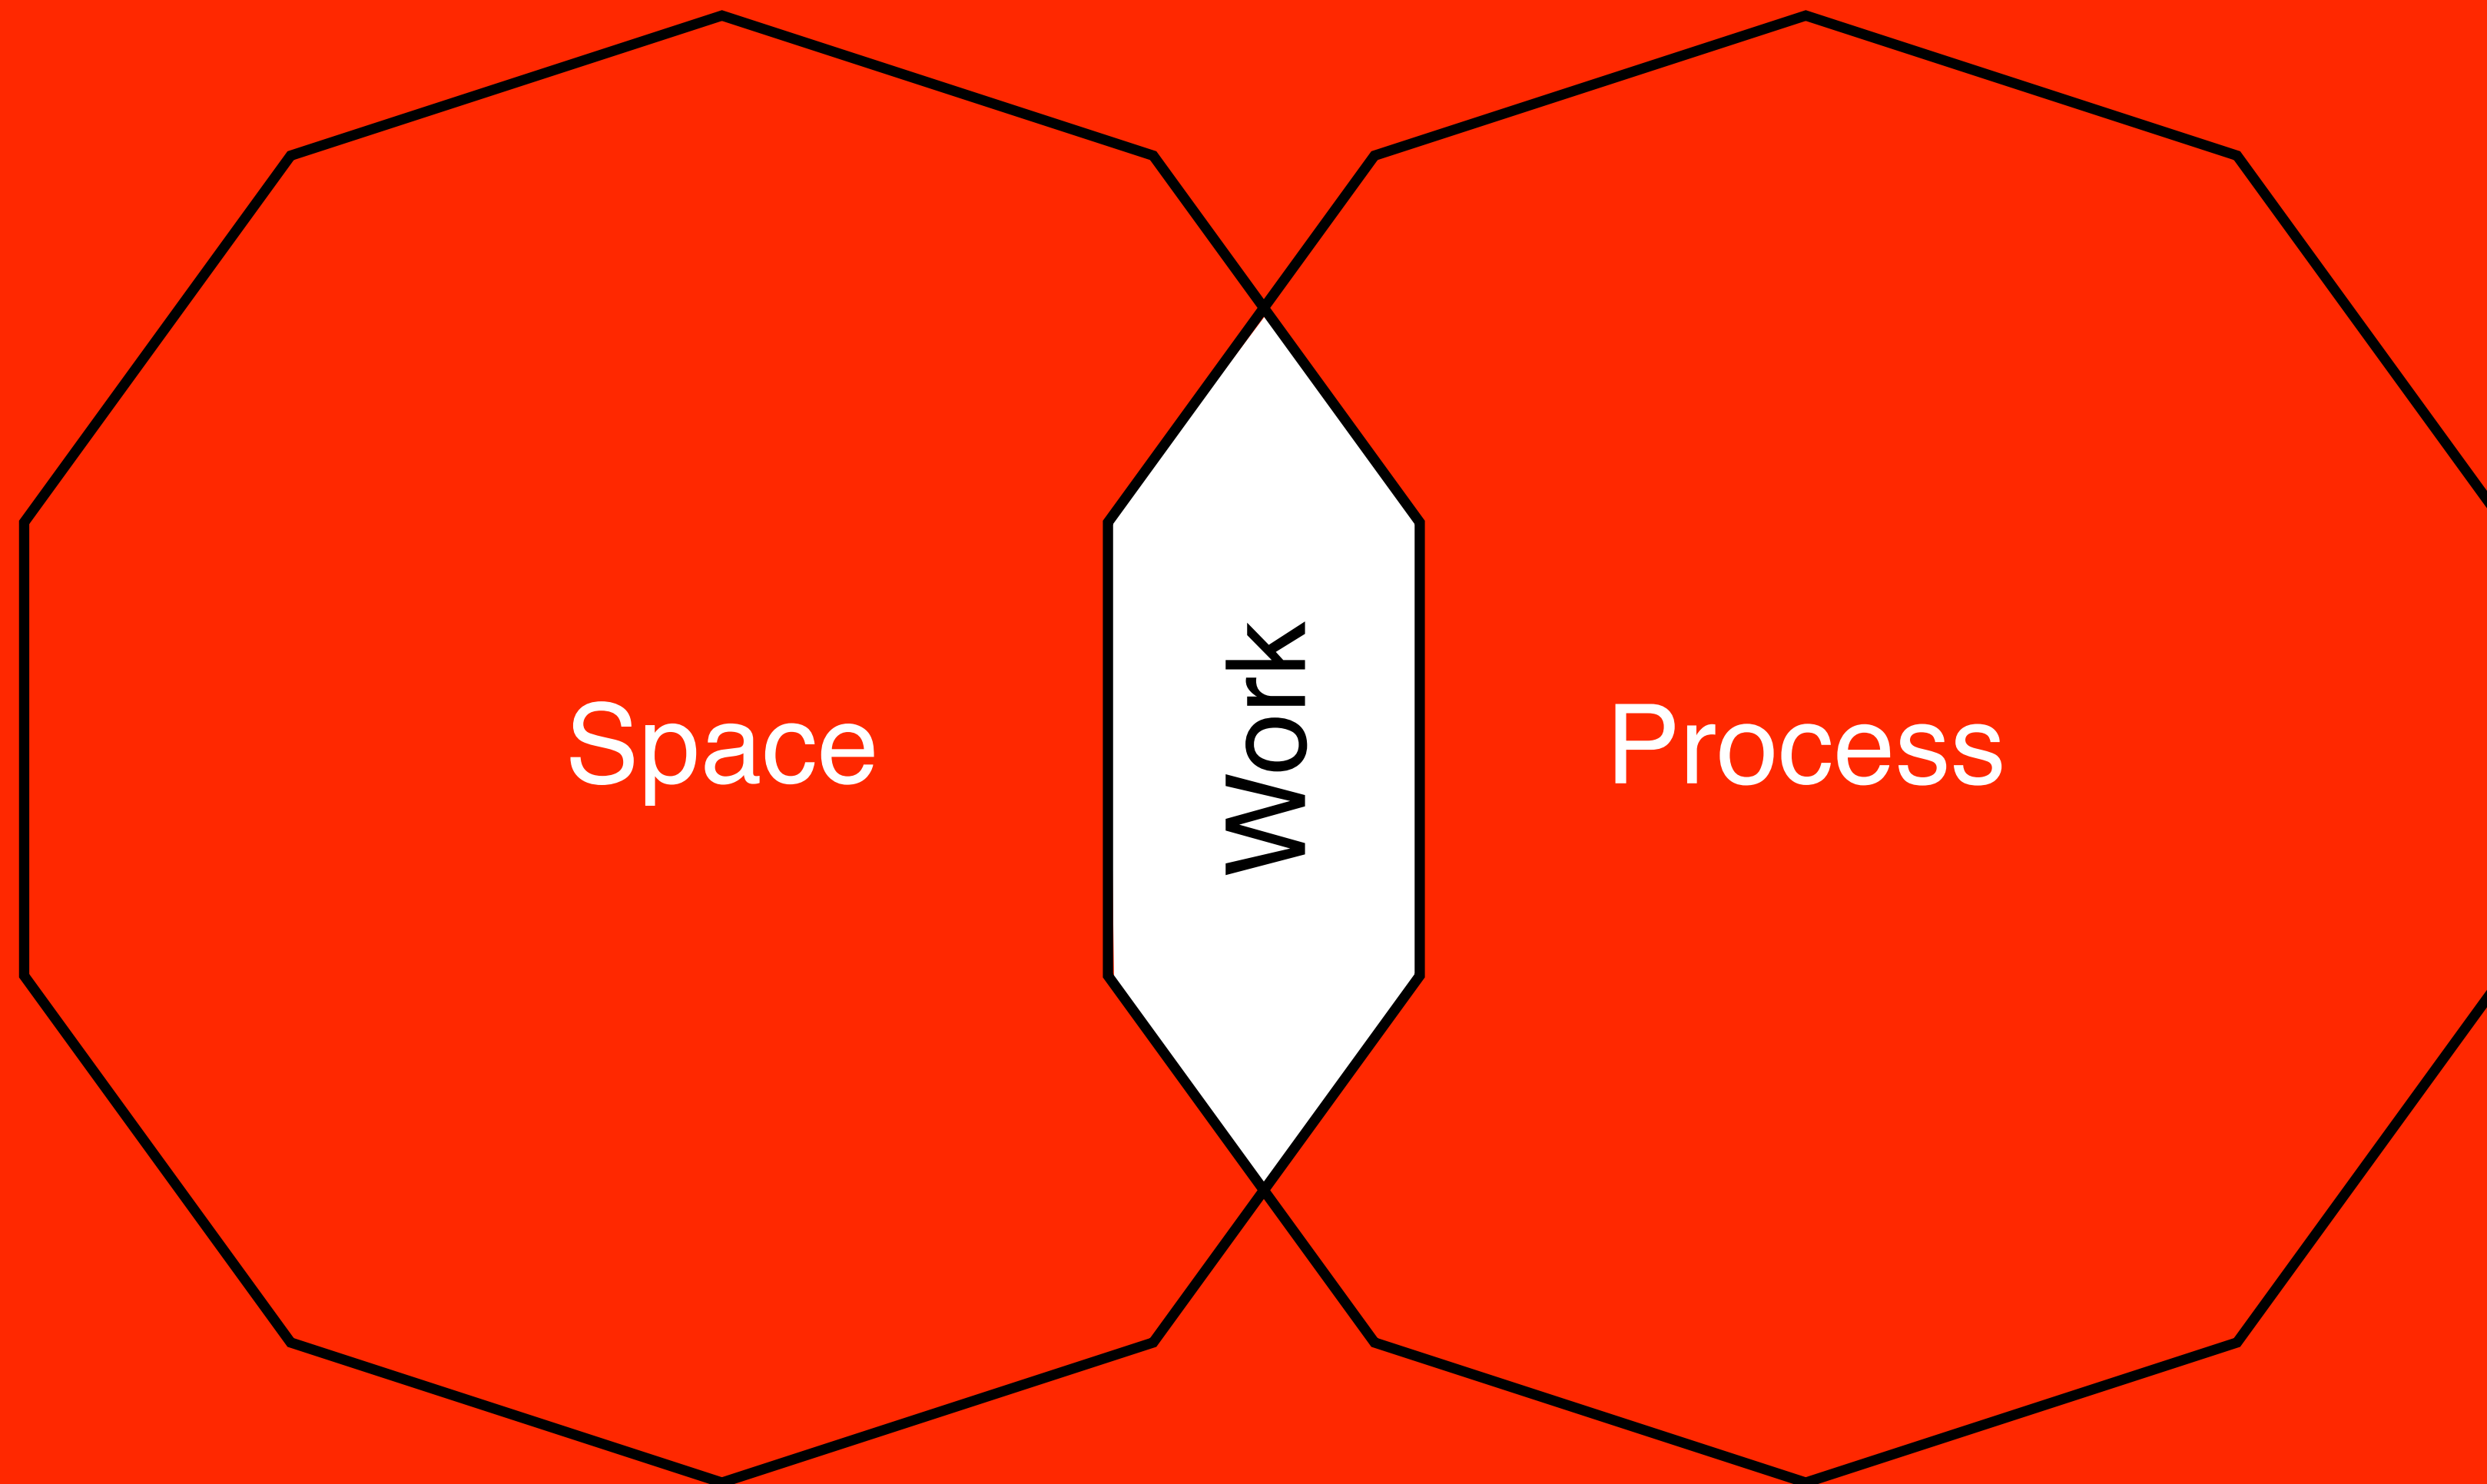

- + Industrial design
- + Narrative Environments
- + Social Innovation and placemaking
- + Workplace Design

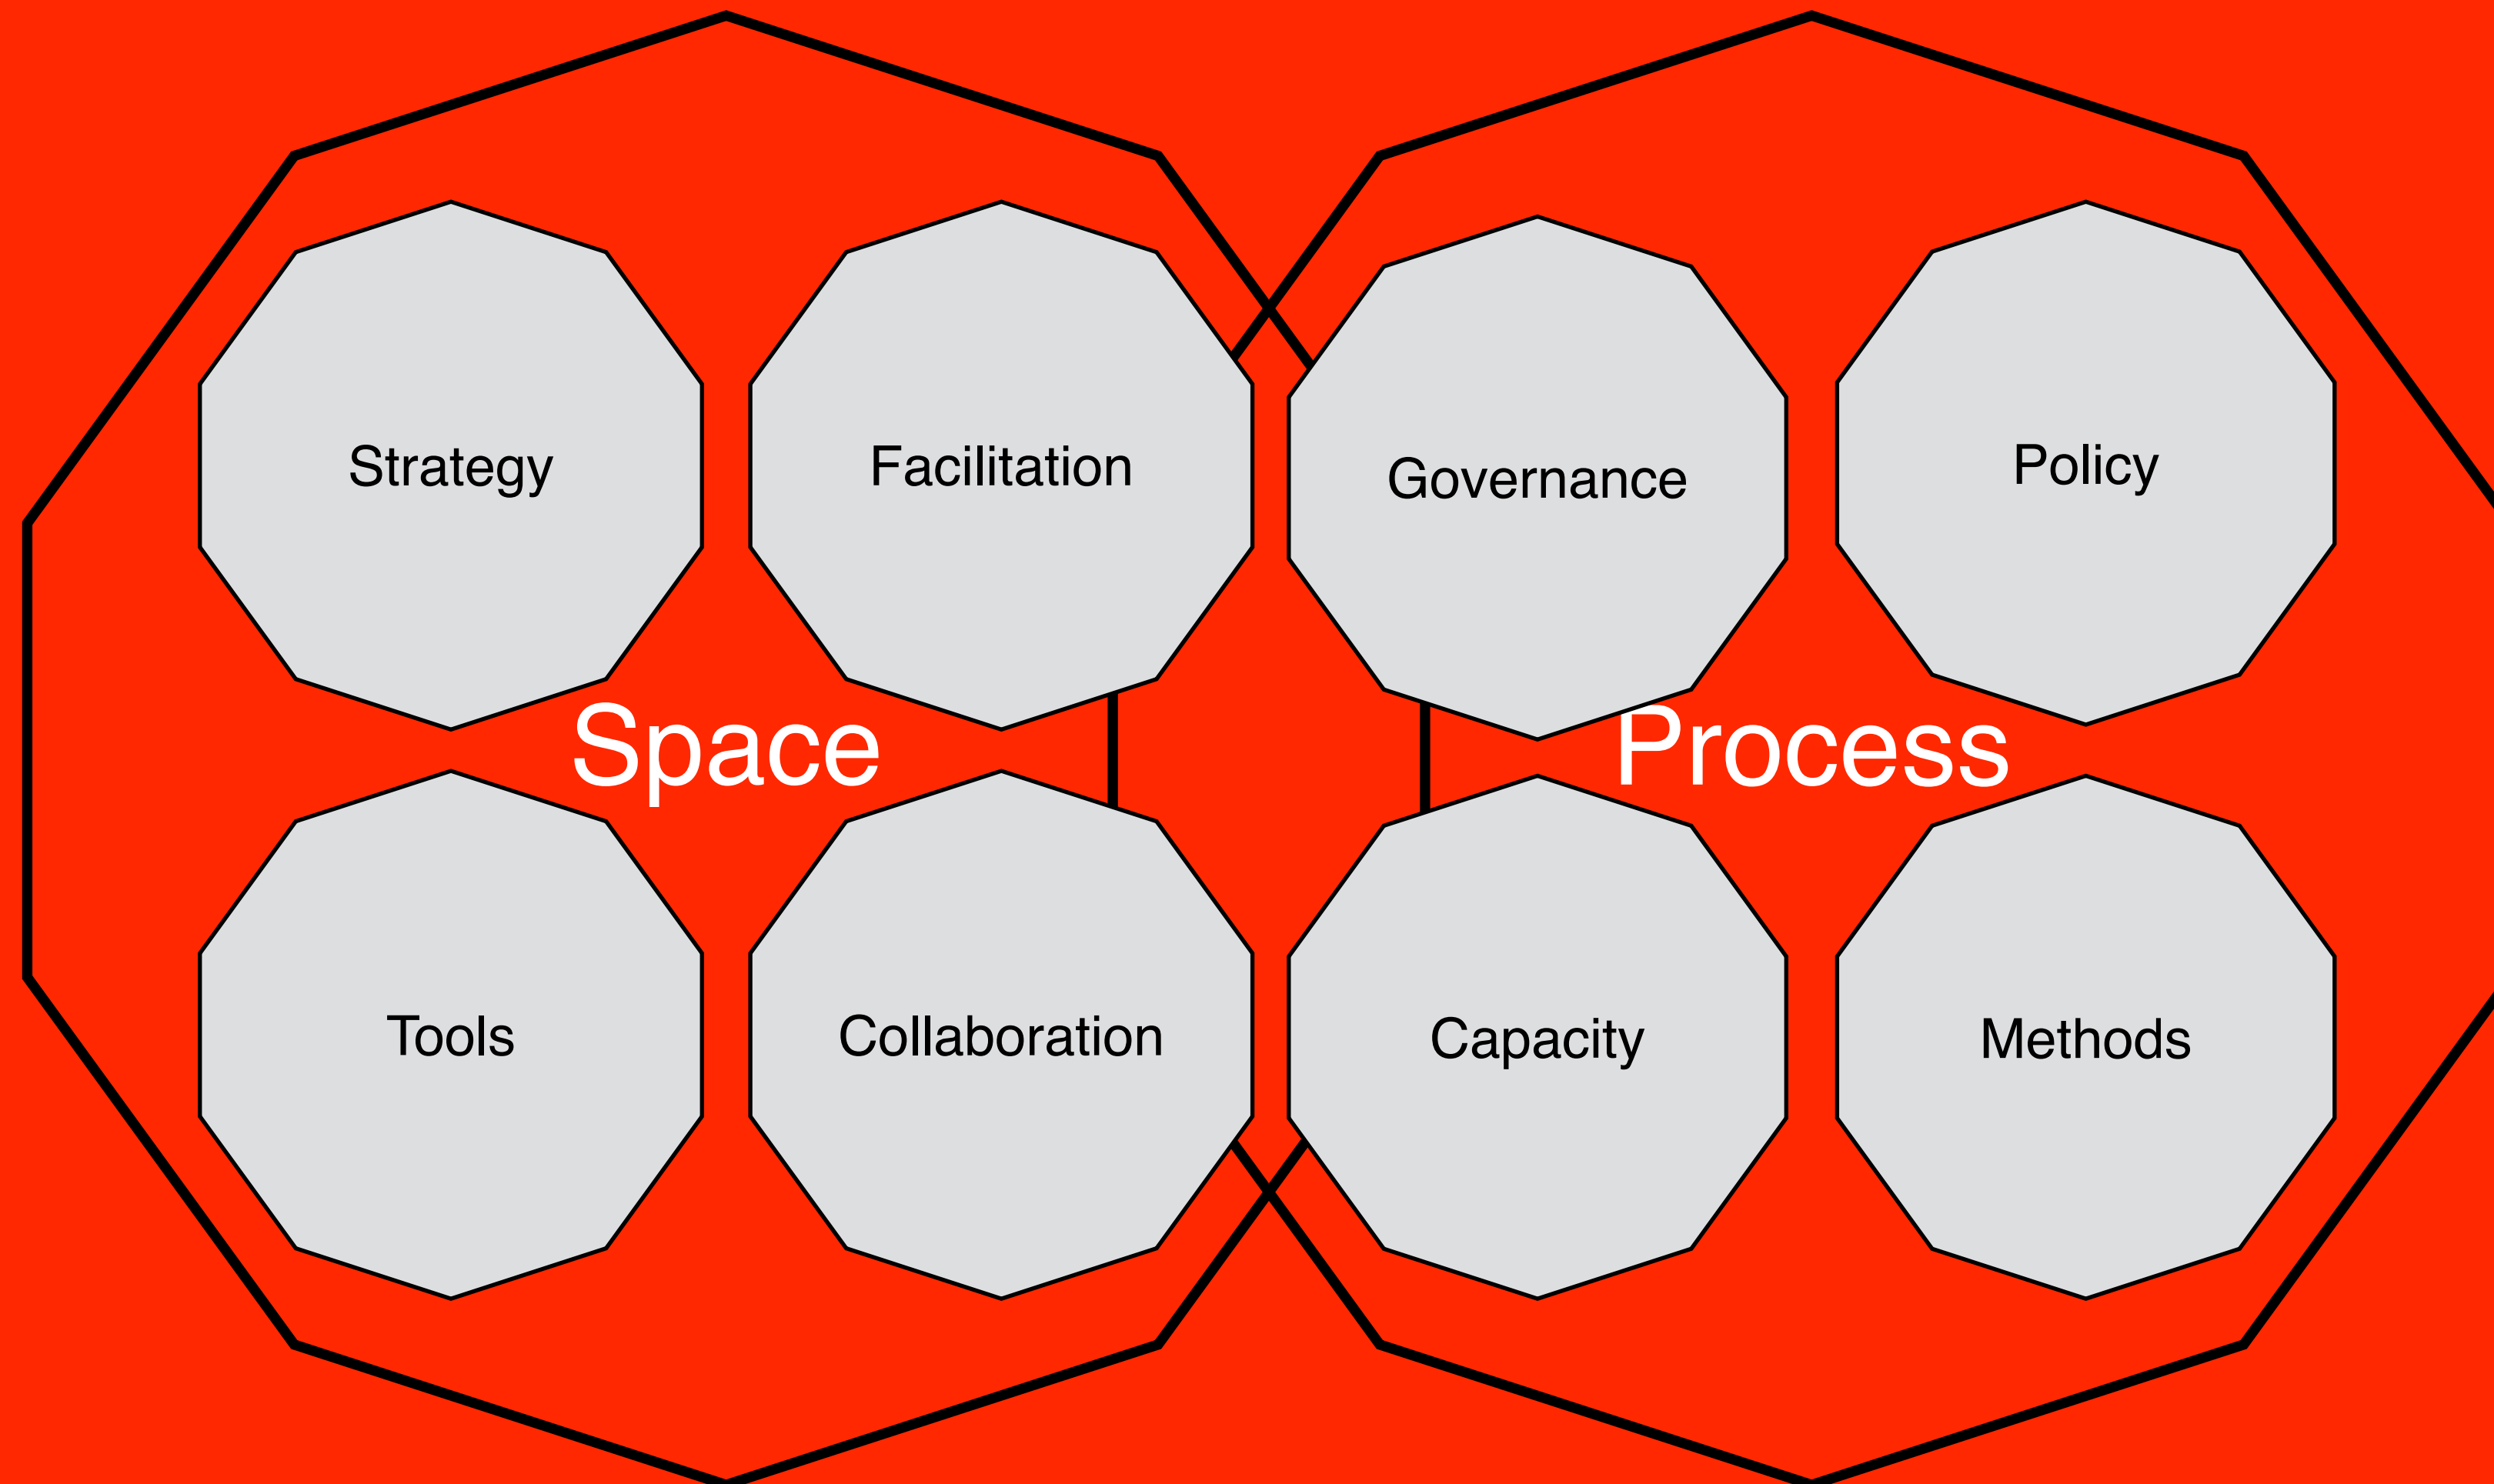

Antonio Starnino

- + Service Design
- + Facilitation
- + Human System Interactions

Where we work

Work elements

What we do

**Design
Innovation
Capacity**

**Improving work
experiences**

**Workspace
activation**

**Evaluating how
you work**

**Future of Work
insights**

Rules of Engagement

- + Insights from client projects (confidential)
- + Literature on leadership and org design has been considered
- + We are building a new service offer on it

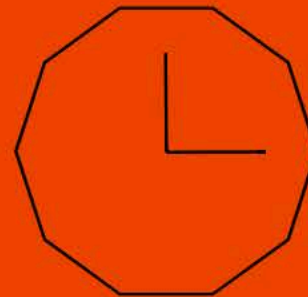

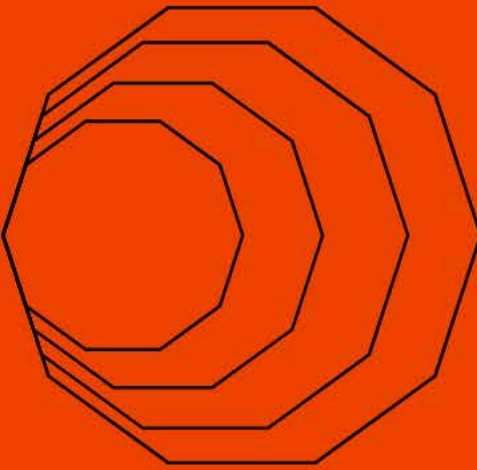

- + Governance is a complex and rich term under discussed in the design world. We want to sensemake it together

Designing and Managing a Design Practice

Activity 01

15' In breakout rooms of 3, quickly introduce yourselves and your roles. —
Based on those three roles create your own ad hoc “design practice”.

What we mean by a design “practice”?

Research	Test	Scale
<p>We map how you currently work, through observation and field research, to identify opportunities for change.</p>	<p>We create models of new workspaces and tools, that we test in curated experiments where teams interact for a facilitated period of time.</p>	<p>We recognize successful interaction patterns and collaboration techniques, to then amplify them within your organization.</p>
		

Why do we need to we need to situate our design practice within a wider construct?

Creative professional often encounter ambiguities. They navigate them, bring clarities, design artifacts out of the complexity of human behaviors and systemic conditions.

How and who decide?

How do we carry ourselves?

Design practice as a tension

INDIVIDUAL

What the
market wants

What as sense
makers we critically
want to pursue.

TESTING

Design practice as a tension

Melissa DeRosa
Secretary of the State

Lives lost yesterday 540

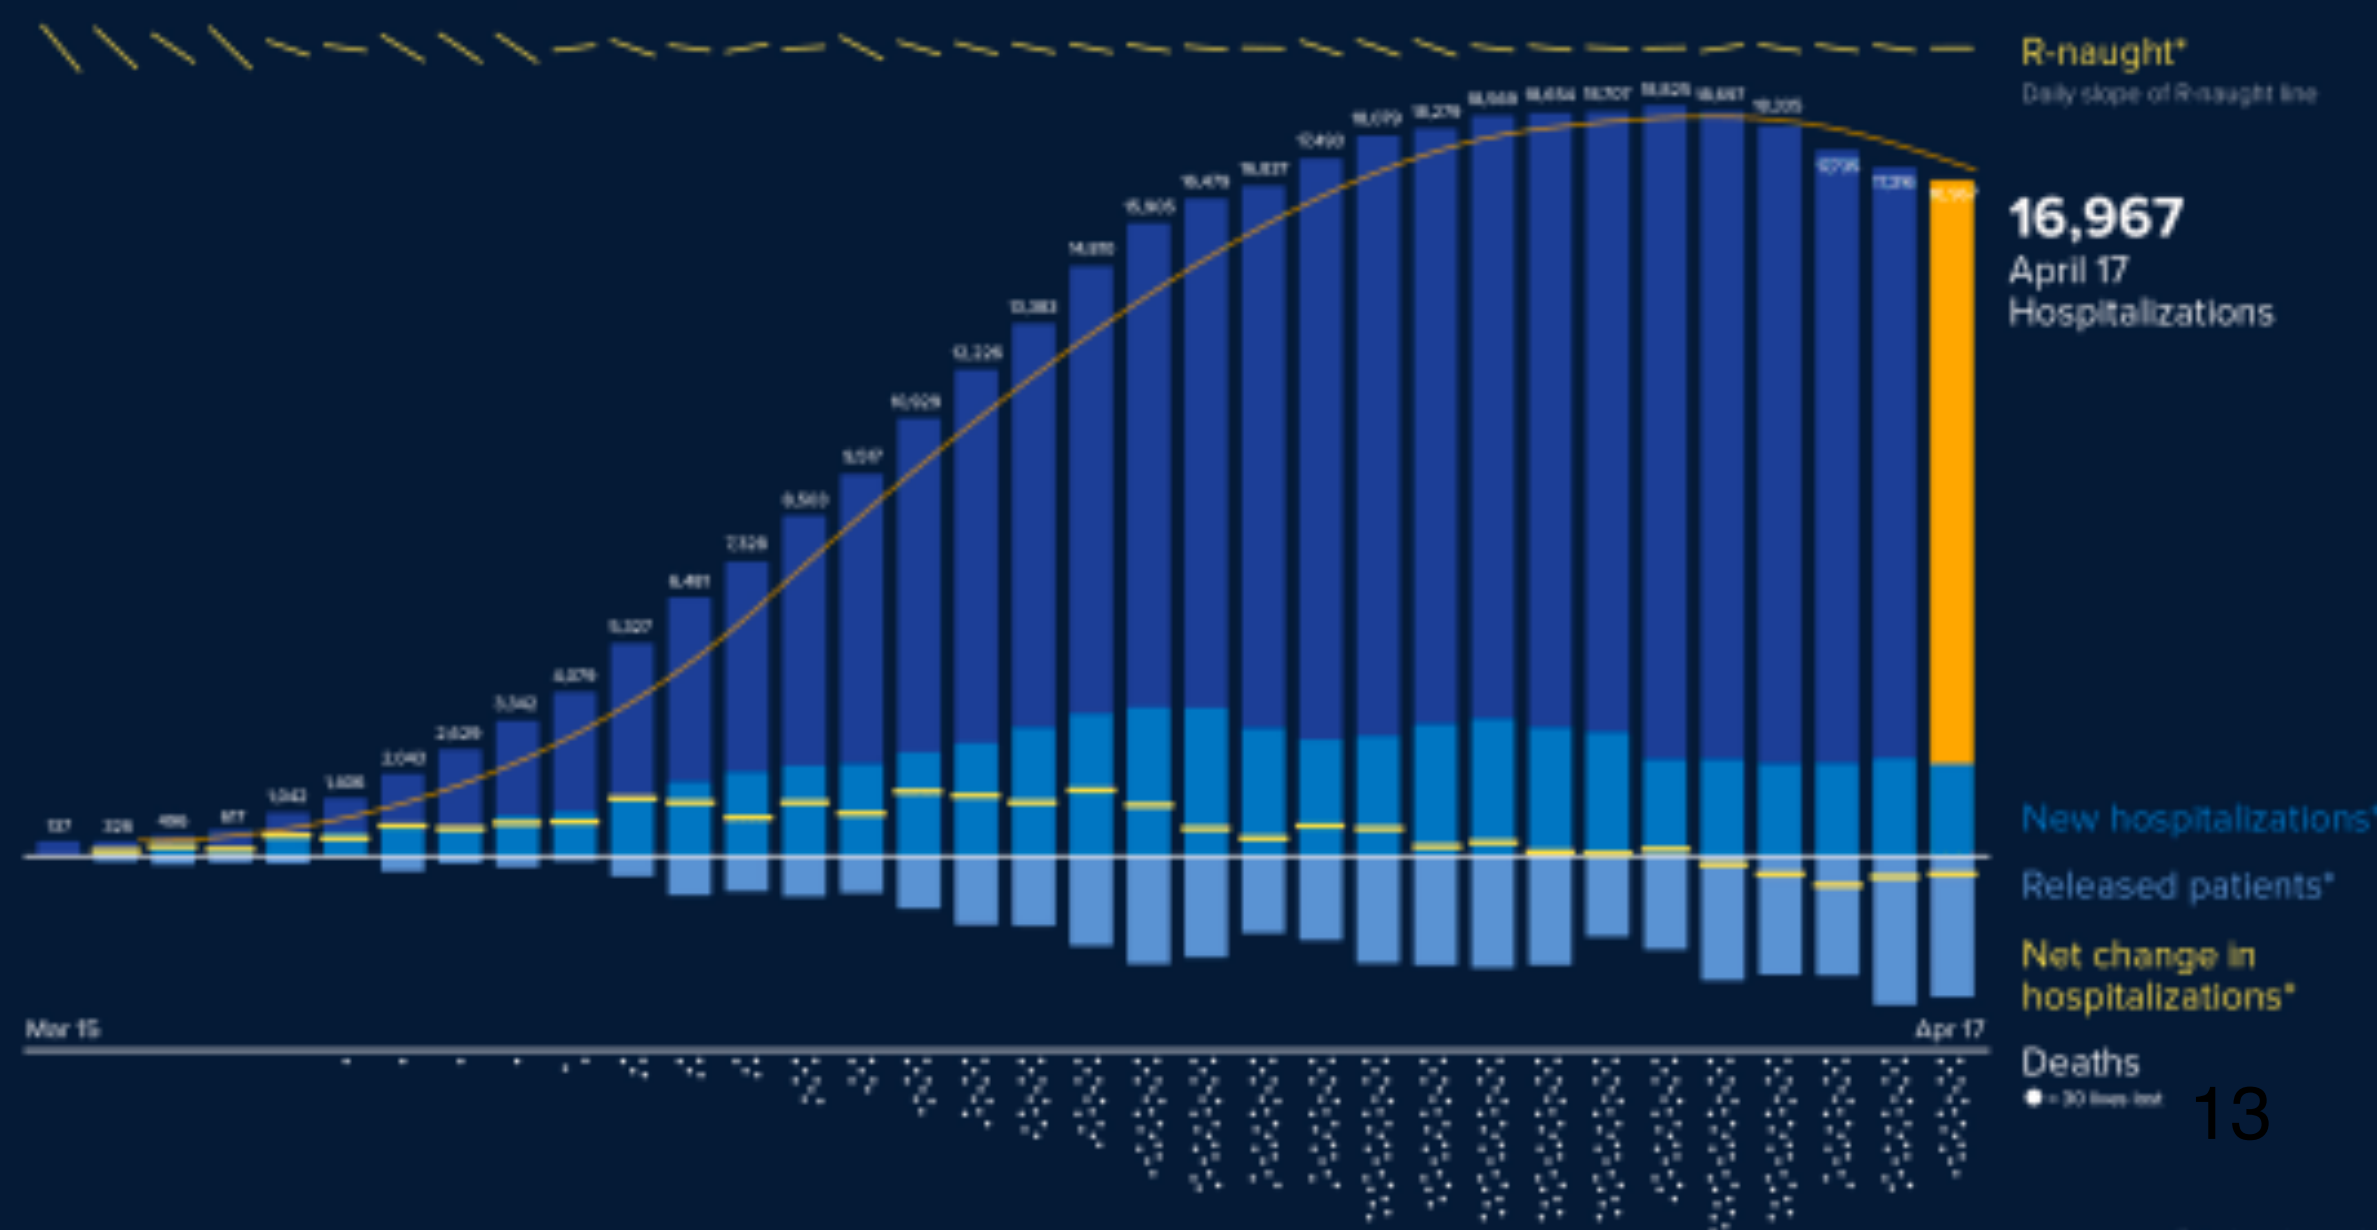

ONE LIFE LOST

504 in hospitals
36 in nursing homes

STAY HOME

STOP THE SPREAD

SAVE LIVES

Design practice as a tension

INDIVIDUAL

What the
market wants

What as sense
makers we critically
want to pursue.

ORGANIZATIONAL

Client briefs
Indicate a
'to do list'

Through research we
discover something
else is needed instead

Design practice as a tension

Cultivating your design practice

Making

craft

- + Judgement
- + Sensibility
- + Skills / Capacity

PRACTICE

Strategic

context / system

- + Building relationship
- + Making decisions
- + Speaking the language of your context

Cultivating your design practice

Making

craft

- + Judgement
- + Sensibility
- + Skills / Capacity

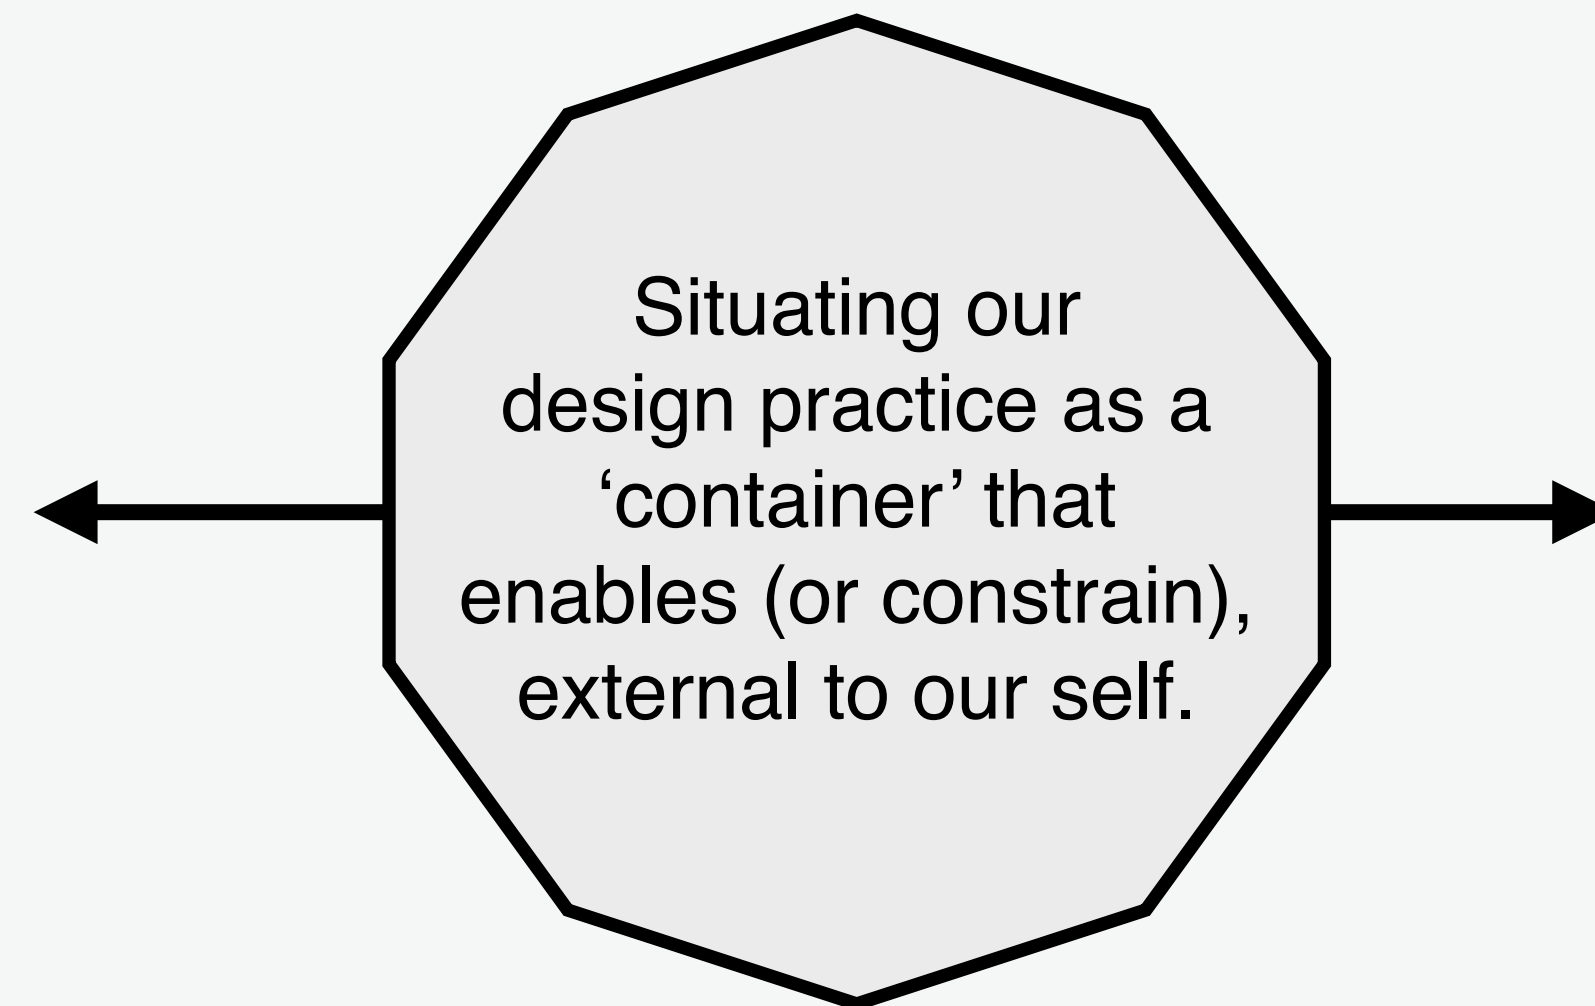

PRACTICE

Strategic

context / system

- + Contextualize your skills
- + Building relationship
- + Making decisions
- + Speaking the shared language within your audience

Governance is a response to this tension to increase the impact of design practice within various contexts and systems. The need to define governance increases as you scale and complexity grows.

Governance

What is it

etymology: to steer – “system set up to make and implement decisions in pursuit of objectives”¹

Where do people have autonomy?

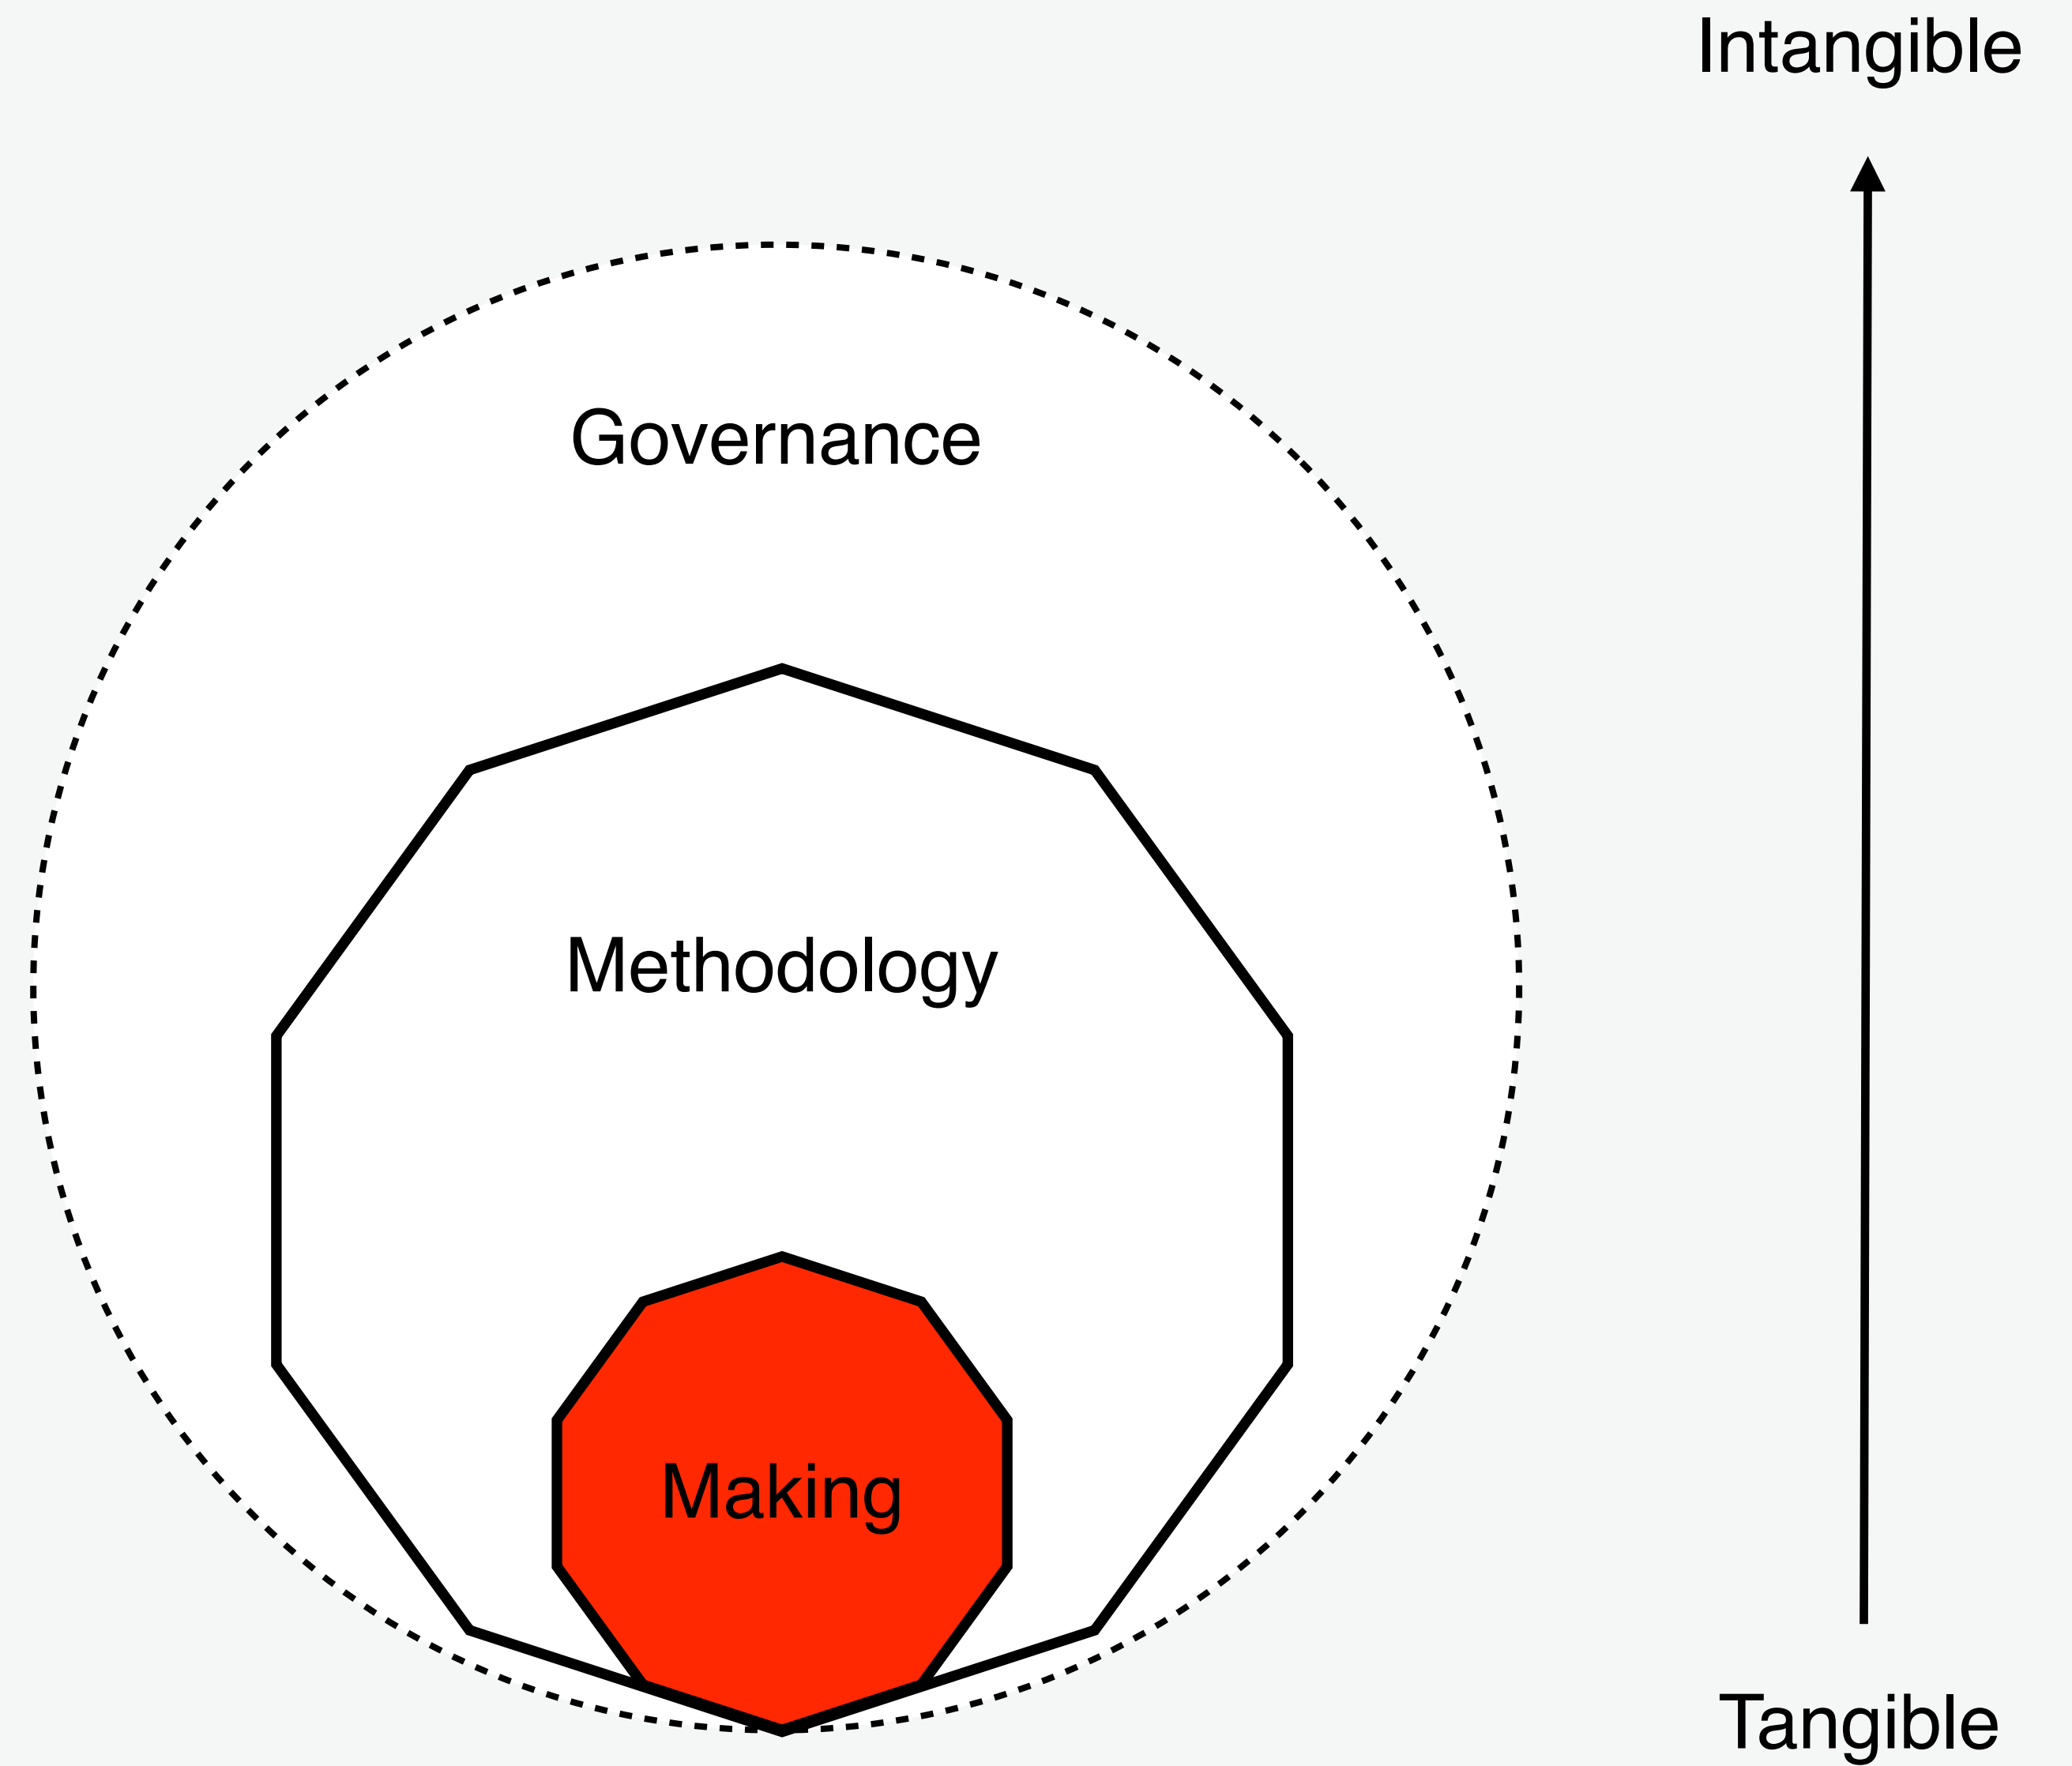

Where do you need group agreement? Consensus?

Who makes which decisions about what?²

¹ ISO 26000

² Starhawk, Empowering Collaborative Groups, Presentation June 25th

Layers of a design practice

Examples of design governance?

A **network** model and a **studio** model are examples of design governance

Design practice as a tension

Space10

StudioWé

Summary

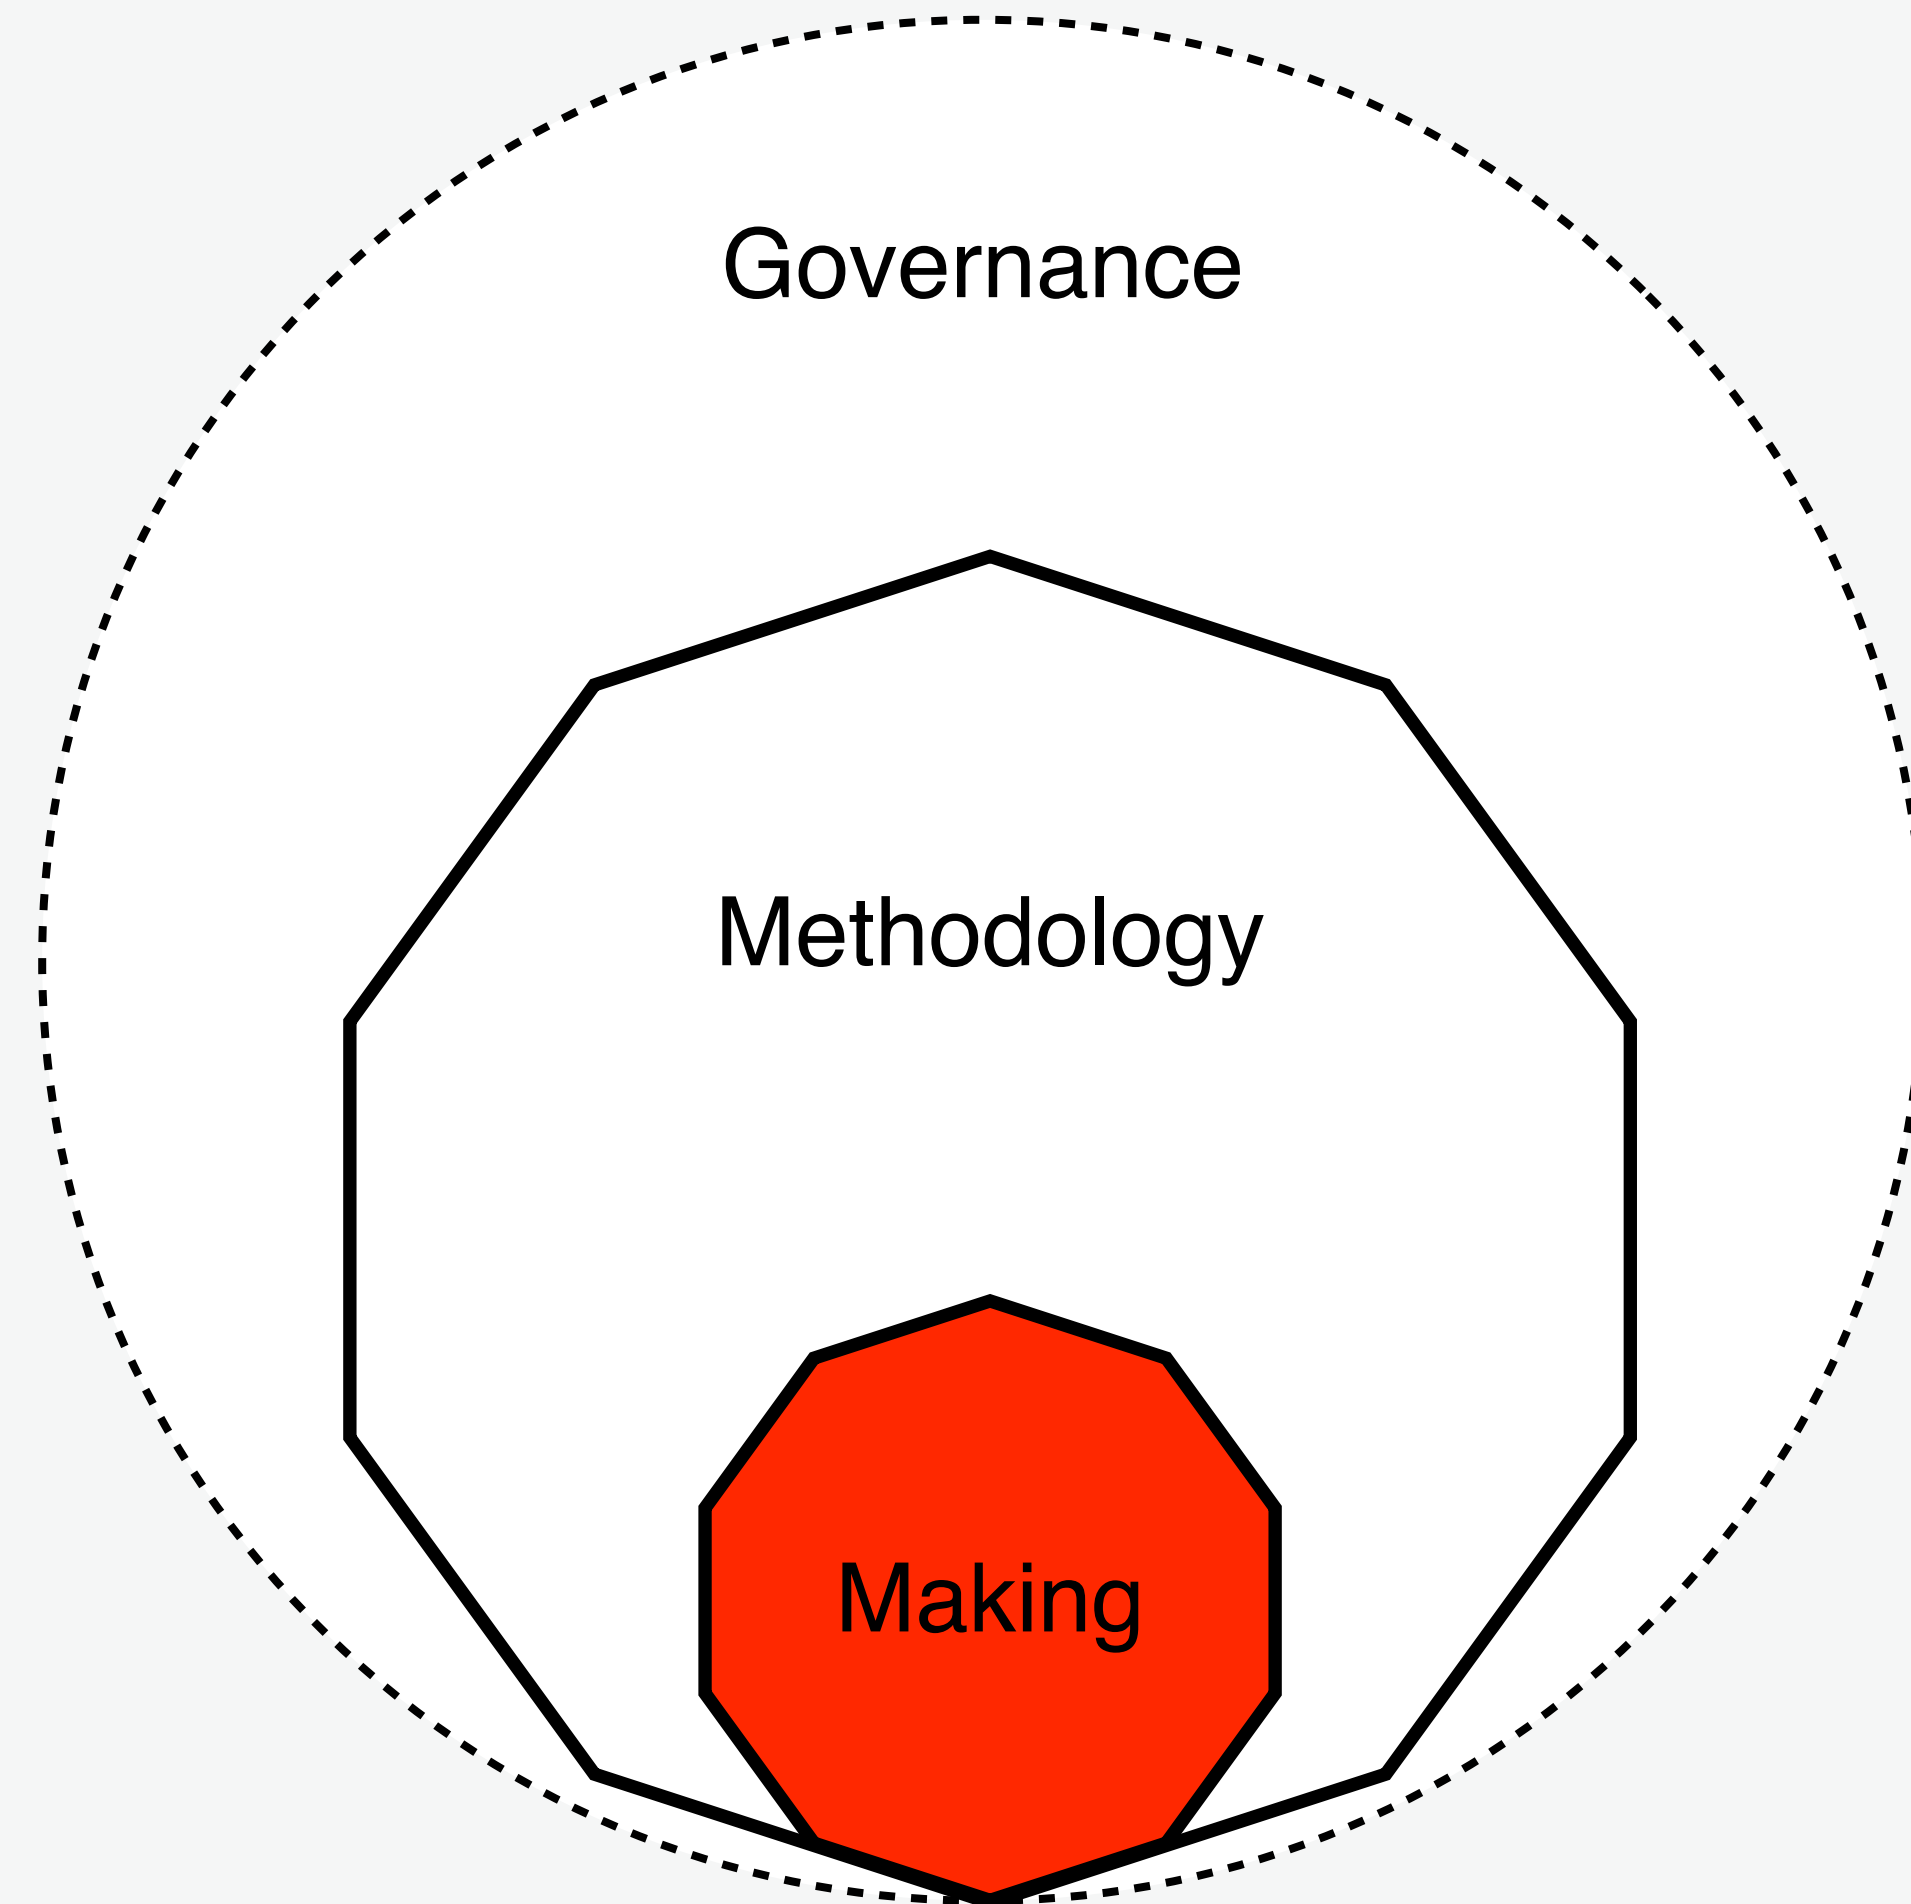

Most design practices within organizations still situates itself in the “**studio**” model. Often this leads to the design function needing to justify itself.

Layers of a design practice

Necessary to sustain
the lower layers

Feeding information
and results to inform
the higher layers

Intangible

Tangible

**Define Design
Governance
Collectively**

Activity 02

10' In the same break out groups of 3,
Define 'governance' on two levels. Place
your answers on the Mural.

What are the parts of governance?

How we further explore them?

**Mural:
Reflections**

Design Governance Mapping

StudioWé

What are the "parts" of governance?

How we further explore them?

Final Reflections

Focus on knowledge and be generative.

↓ Depth

Understand ‘first principles’ instead of methods allow to create your own methods.

→ Continuity

Cultivating an independent body of knowledge helps navigating difficult times and transitioning between industries and careers.

→ Generosity

Projects that bring you intellectual and educational development can be valuable and appropriate also as pro-bono.

Governance can be designed: prototype interactions.

Governance ‘bodies’

- + Boards
- + Councils
- + Town Halls
- + Committees

Governance touchpoints

- + Voting / Decision Making
Systems
- + Metrics
- + Contracts
- + Agreements / Principles
